

ENVIRONMENTAL SUSTAINABILITY POLICY

Environmental Sustainability

Delmar Systems is committed to develop, implement and maintain environmental best practices, products and processes that prevent pollution and protect biodiversity and ecosystems from all activities in which we are involved.

Our Commitment

In our effort to continuously support an environmentally sustainable industry, we are committed to:

- identify, control, and monitor our environmental aspects and impacts
- prevent any short and long-term impact on the environment and local communities
- promote a positive culture through implementing initiatives that foster sustainable innovation
- provide our clients with environmentally friendly products and solutions
- manage and minimize our waste and carbon footprint
- develop, implement and maintain a management system based on ISO 14001 standard
- evaluate the performance, effectiveness and compliance of our environmental management systems through regular audits and reviews
- comply with relevant laws, regulations, industry codes, licenses and customer requirements

John Shelton

Chief Executive Officer
